1 US gallon / 128 fl oz
100% Natural Digestive Supplement

BALANCE^R2 is 100% natural mix of billions of beneficial microbes—bacteria and fungi - that animals must have for optimum health. Our proprietary mix of microbes may strengthen the microbiome in digestive systems and enhance overall function. By increasing the gut microbial population, immune function and digestive capabilities may be naturally improved, while diseases and pathogens may be suppressed. **BALANCE^R2** may help balance pH, as well as prevent colic/loat and reduce the incidence of *Salmonella*, *E. Coli*, *Streptococcus*, and other harmful pathogens.

DIRECTIONS FOR USE			SHAKE WELL BEFORE USING
TREATMENT	TYPE CULTURE	DOSAGE	FREQUENCY
Oral drench (loading dose, stress periods)	Cattle, sheep/goats, deer, dogs, cats and other animals	Drench at a rate of 30-50ml per 100 lbs body weight. For yearling calves: Add 30ml per head in water trough. For small animals: Add 2-4ml per head in water container or dosimeter.	Daily, for 5-7 days
Oral dose (maintenance)	Cattle, sheep/goats, deer, dogs, cats and other animals	Drench, add to water container, or top-dress feed at a rate of 15-25ml per 100 lbs body weight. For yearling calves: Add 15-20ml per head in water trough. For small animals: Add 0.25-0.5ml per head in water container or dosimeter.	Daily for routine biocontrol and probiotic measures
Emergency Bloat aide	Cattle, sheep/goats, deer, and other ruminants; horses	Using a gastric tube or drench gun, drench at a rate of 50ml per 100 lbs body weight. Repeat within 6-8 hours if symptoms haven't subsided. If bloat hasn't subsided within 12 hours, seek veterinary treatment. Treat subsequently with a daily maintenance dose.	One (1) to two (2) times
Prepartum (2-3 weeks prior to birthing)	All classes of livestock	Top-dress feed, or add to water container at a rate of 20-25ml per 100 lbs body weight.	Daily
Postpartum	All classes of livestock	Top-dress feed, or add to water container at a rate of 15-20ml per 100 lbs body weight.	Once daily for 45 days
Newborn oral dose	All classes of livestock	Drench at a rate of 10ml per 100 lbs. For small animals: Drench at a rate of 0.25-0.5ml per pound of body weight. DO NOT mix with milk replacer. Administer at least one hour before or after nursing.	One time
Wound care/skin irritations	All classes of animals	After debriding with water, spray undiluted, liberally, on affected area(s). For severe wounds, bandaging may be necessary. Continue treatment until wound is healed.	1-2 times daily as needed
Stall/barn treatment	All classes of livestock	Mix 1/2 gal with 5 gallons water. Spray stall liberally.	Prior to stalling; between rotating animals
Trough/aquatic cleanse	All animals and aquatic facilities	For troughs: Add 1 gallon per 250 gallons of water volume. For aquatic facilities: Add 1 gallon per each 33 cu ft of water volume.	Once monthly, or as needed for cleansing

Storage: For full product shelf life, store at 45-85°F. KEEP OUT of direct sunlight. DO NOT freeze.

Safety: The microorganisms used in this product are not likely to cause illness to healthy humans. NOT RECOMMENDED FOR HUMAN CONSUMPTION. Personal protection equipment (PPE) may or may not be used by applicator. Floating particulates may be present, as well as a slightly pungent odor.

DISCLAIMER/NOTICE TO BUYER: To the extent consistent with applicable law, seller warrants that this product conforms to description on the label and is reasonably fit for purposes stated on this label only when used in accordance with directions under normal conditions. This warranty does not extend to use of this product contrary to label directions, or under abnormal use conditions, or under conditions not reasonably foreseeable to seller. Buyer assumes all risk of any such use. To the extent consistent with applicable law, seller makes no warranties, expressed or implied.
